Europe's No. 1 for fingerprint access solutions

More than one million satisfied customers are the best possible recommendation for our products! For many years, both private households and leading companies alike, along with organizations such as fire and rescue services, have been putting their trust in proven ekey finger scanners.

ekey was founded in 2002 and is now Europe's No. 1 for fingerprint access solutions. ekey puts authorization into the customer's hands! Keys, cards, codes, etc. can be lost, forgotten, or stolen. „Your finger is always on hand!“ ekey's wide range of products includes finger scanners for doors, gates, alarm systems, and time recording.

The international company currently has 90 employees at its 5 locations in Austria, Germany, Liechtenstein/Switzerland, Italy, and Slovenia, and exports its products to over 70 countries, which makes up 73% of its business. ekey's main sales markets include Spain and the USA, in addition to Austria, Germany, Switzerland, Slovenia, and Italy.

QUALITY

All ekey products undergo a rigorous endurance test before they reach the market. The test involves intensive simulations of heat, cold, and high humidity, and every

finger scanner is subjected to these conditions, along with all of its components, countless times before reaching the customer.

Our quality formula comprises the highest standards of functionality, reliability, and security, which are refined by means of extensive testing.

Quality-tested products from ekey – you can count on us!

CERTIFIED QUALITY

MADE IN AUSTRIA:

- Extensive production, manufacturing, and functional testing (zero tolerance)
- Testing for environmental and temperature resistance
- Vibration and shock-tested
- Tested for penetration of water and mechanical parts
- Quality management system in accordance with EN ISO 9001:2008
- CE-compliant

” *After hundreds of years’
service, the key has served
its time –
now you literally have the
future in your hands!* “

Dr. Leopold Gallner | CEO, ekey biometric systems GmbH

YOUR FINGER. YOUR KEY.

As unique as a fingerprint.

For more than 15 years, ekey has been developing both products and solutions that revolutionize entire industries. Using our supreme technological expertise, we harness the advantages of biometrics and make the everyday lives of over one million users easier – a figure that is increasing by the day!

The spirit of innovation and commitment to quality shown by our dedicated employees have enabled us to become Europe’s market leader for fingerprint access solutions. Demonstrated by each individual, this drive is what sets ekey apart as a company and forms the basis for future-oriented visions and the realization of extraordinary technologies.

In addition to functionality, we place great value on design. Our aim is to ensure that the technology blends discreetly into the architecture. Many well-

known manufacturers incorporate ekey finger scanners right from the product design phase and integrate them flawlessly.

Biometrics is making our everyday lives simpler and more secure. Finger scanners are now an integral part of daily life – smartphones, house doors, fingerprint payments, to name but a few examples. ekey develops fingerprint access solutions that offer unparalleled convenience and ultimate security for your home or business.

After hundreds of years’ service, the key has served its time – now you literally have the future in your hands!

The app function is only compatible with ekey/home - Single-point access solutions.

ekey finger scanner integra for mounting next to the door

With the *ekey mounting frame FS integra*, the finger scanner can easily be wall-mounted next to the door. With this solution, ekey has paid special attention to design and the elegant processing of high-quality materials, such as stainless steel and IMPAdur® special glass. On request, the mounting frame is also available complete with a bell module following the same design. If required, the status of the alarm system can also be displayed by LED.

The app function is only compatible with ekey home - Single-point access solutions.

Interfaces for integration in building control systems

ekey makes your home more intelligent

By integrating ekey fingerprint access solutions into your building control systems, you get lots of new options:

- With ekey, the house knows who is present and who is not in the house.
- Depending on who is entering the house, it is possible to do much more with your fingerprint than simply opening the door – you can also save a lot of energy as the lighting, heating, and blinds are controlled intelligently.
- These options can be configured on a user-specific basis – so the TV and the stove remain off when it's just the children at home, for example.
- It is even possible to implement time-dependent authorizations: This means, for example, that the cleaner only has access to the house at certain times.

When it comes to the user-defined options, the only limit is the user's imagination.

- For public buildings and companies, there is the option to record who has entered the building, as well as the time and location at which they entered. This also makes it possible to use the system for time-recording purposes.
- What's more, information about whether an authorized finger has been swiped over the reader is available. If the person is not authorized, this information could be used to switch on the garden lighting and store a photo from the door camera in an archive, for example.
- Using a logic in the building control system, it is possible to trigger a different command with each finger saved.
